Getting Started

Schwab

Tour of Rstudio

To help remember all of the things we need for this class, I've made a cheat sheet.

Let's reference it to do the following:

- Make/knit your first .Rmd
- Keep yourself organized
- Focus on the name of the file's spacing
- Renaming a file
- Downloading file from Rstudio.
- Uploading a file to Rstudio.
- Copying and pasting plain text.
- Taking a screen shot

Console vs. Rmarkdown

- Scratch work can be done in the console
- Do homework calculation in an .rmd to save your work.
- R Assignments knit in markdown

Grey Chunk vs white space - Spacing in chunk - Chunk titles

Practice - Make/knit second .Rmd file. - Delete all the default stuff below the YAML. - Add a chunk to add some numbers together. - Save it as practice.rmd - Knit your markdown file as .pdf. - Download file

Upload MTH 142 files for students.
